Art Unit: 2651

#### **DETAILED ACTION**

1. The amendment filed November 7, 2003 has been received and has been made of record. An Office Action in response to the above amendment follows.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Patti et al (US 6,359,743 B1).

Re claims 1 and 6; Patti et al disclose an offset correction circuit to correct DC offset (Fig. 3, 102; a thermal asperity causes a DC offset, see Fig. 2A) in accordance with a data rate (col. 6, lines 51-56), comprising: a detection circuit to detect a thermal asperity signal (Fig. 3, 106); and a filter circuit to respond to the thermal asperity signal in accordance with the data rate (Fig. 3, 112; col. 6, line 55). Patti et al further disclose a disk drive system for reading and writing information on a disk (Fig. 1, 12, 14) comprising: a head to read/write information on the disk (Fig. 1, 14); a preamplifier to amplify the information (Fig. 3, 100); and a read channel to process the amplified information, the read channel including the offset correction circuit to correct DC offset in accordance with a data rate (Fig. 3, remainder of 23).

Application/Control Number: 09/902,051

Art Unit: 2651

Re claims 2 and 7; Patti et al disclose that the filter circuit affects the DC offset in accordance with the data rate (Fig. 5, 132; col. 6, lines 43-56).

Re claims 3 and 8; Patti et al disclose that the filter circuit is a transconductance circuit (see Fig. 5).

Re claims 4 and 9; Patti et al disclose that the transconductance circuit shunts current in accordance with the data rate (see Fig. 7, input from 110 to 130).

Re claims 5 and 10; Patti et al disclose that the transconductance circuit includes a FET to shunt current in accordance with the data rate (col. 5, line 65 – col. 6, line 2).

### Response to Arguments

4. Applicant's arguments filed November 7, 2003 have been fully considered but they are not persuasive.

Applicant argues that the resistance circuit of Patti (the filter circuit) does not respond to data rates. This argument is not persuasive since the claims do not state that the filter circuit responds to data rates. Rather, they state that the filter circuit corrects DC offset in accordance with a data rate. Patti discloses that depending on the data rate, the programmable resistance settings of the resistance circuit are different. This satisfies Applicant's claim language "in accordance".

#### Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2651

TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Dan I Davidson whose telephone number is (703) 308-

8535. The examiner can normally be reached on Monday-Friday from 8:30AM to

5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David R Hudspeth, can be reached on (703) 308-4825. The fax phone

number for the organization where this application or proceeding is assigned is (703)

872-9314.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is (703) 305-

4700.
